## Case Study

### SMB Group installs Cleveland Cascades Shiploader in Klaipeda

Customer	SMB Group	Location	Klaipeda, Lithuania
Date	November 2011	Material handled	Fertilizer
Application	Ship loader	Loading rate	1,500 tonnes per hour
Chute Type	CCL 1500 Series	Chute Length	18 metres

**SMB Group** has recently serviced the **Cleveland Cascades Limited** Loading Chute at its facility in Klaipeda Port.

The SMB Shiploader is just one of a number of Cleveland Cascades Chutes operating in Lithuania, as the company boasts a strong presence not just in the port of Klaipeda, but across the country as a whole.

Established in 2004, and with over 600 systems already in operation throughout the world, **Cleveland Cascades Limited** is at the forefront of the bulk loading industry.

The company's expert teams in design, manufacture, assembly and commissioning are constantly striving for cutting-edge solutions in bulk handling and loading of problematic materials.

For further details on our innovative bulk material loading solutions please contact us by email, fax or telephone using the contact details shown above.

*The Cascade Loading Chute is used to load numerous fertilizers including ammonia, potassium and red phosphorus. The Chute is capable of loading at rates of up to 1500tph.*

*This photograph shows the spout distributing red phosphorous into hard-to-reach areas underneath the hatch-coamings of the ship using a Trimming Spout. This maximises the available loading space as well as minimising loading times.*
