Case Study

SMB Group services Cleveland Cascades Shiploader in Oman

Customer	SMB Group	Location	Sohar Port, Oman
Date	July 2012	Material handled	Granular Urea
Application	Ship loader	Loading rate	1,200 tonnes per hour
Chute Type	CCL 1500 Series	Chute Length	20 metres

SMB Group has recently serviced the **Cleveland Cascades Limited** Loading Chute at its facility in SIUCI Sohar Port, Northern Oman.

As the first such system to be installed in the country, this represents yet another export success for Cleveland Cascades in the Middle-East as it continues its outreach across the globe.

Established in 2004, and with over 600 systems already in operation throughout the world, **Cleveland Cascades Limited** is at the forefront of the bulk loading industry.

The company's expert teams in design, manufacture, assembly and commissioning are constantly striving for cutting-edge solutions in bulk handling and loading of problematic materials.

For further details on our innovative bulk material loading solutions please contact us by email, fax or telephone using the contact details shown above.

The Cascade Loading Chute is used to load granular urea, a valuable fertilizer, and is capable of loading at rates of up to 1200tph.

The chute is equipped with a rotating trimming spout that distributes the urea into hard to reach areas underneath the hatch-coamings of ships.

This maximises the available loading space as well as minimising loading times.
